Planting Date: Grand Forks and Nelson - May 16, Marshall - May 17.

Harvest Date: Grand Forks and Marshall - Nov. 9, Nelson - Nov. 30.

¹Relative maturity as given by industry.

²Grain moisture is an average of Grand Forks and Marshall, test weight is from samples from Nelson County only.

³Average is for Grand Forks and Marshall locations only due to high variability in moisture at Nelson County.

⁴Farmer provided check.

⁵Conventionals were included as part of the trial at the Grand Forks County site, so the same LSD values apply when comparing with non-conventionals. Because they were not included in all locations, there is no average value for the zone and they have not been sorted by yield as have the other hybrids.
