Superior Yield Potential Combined with Artesian Technology

- Maximizes yield when it rains; increases yield potential when it doesn't
- Broad adaptability that allows for wide placement across the Northern Corn Belt
- Heavy test weight

Yield advantages are composites based on the results of 2022 and 2023 comparisons from Syngenta first-party trials and when available FIRST trials and independent third-party trials. For more information regarding yield comparisons against an individual product, ask your Syngenta representative.

© 2023 Syngenta. Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium-based herbicides.
